

Your guide to the best production
engineering articles of 1985. Keep
in a safe place for easy reference.

INDEX TO PRODUCTION ENGINEER Vol 64 1985

**Journal of the Institution of
Production Engineers**

INDEX TO PRODUCTION ENGINEER Vol 64 1985

Subject index

£3½ million automates assembly line and store at Perkins **January p13**
 £½M installation puts company at 'forefront' **March p18**
 £250 000 system increases capacity at Ranco Controls **June p16**
 20% increase in turnover using EDM (EDM feature) **December p33**

A

A 'new approach to punching' **Oct p41**
 A system 'likely to pay off' **Jan p35**
 AA boosts output at Antiference **May p17**
 'Acquire skills and knowledge', says survey **Feb p40**
 Adhesives feature **March issue**
 Teaching engineers about adhesives **p37**
 Bostik used in sports car production **p45**
 Polar robot glues 'in seconds' **p45**
 Hot melt adhesives used in manufacturing and packaging **p46**
 Quality control from new range of potting and bonding machines **p49**
 Agricultural machinery firm builds £1M FMS **Oct p11**
 Alive but not well—quality circles **Oct p22**
 AMT—investing in advanced manufacturing technology **Oct p19**
 An end to powercuts? **Oct p41**
 An insight into Inspec **Mar p32**
 Anilam CNC makes form grinding 'less arduous and more accurate' **Jul/Aug p41**
 Annealing eliminated by special tooling **Feb p51**
 Assembly:
 £3½M automates assembly line and store at Perkins **Jan p13**
 Assembly system 'designed to promote flexibility' **Feb p22**
 Perkins learns a few lessons **May p27**
 Auto-changer for probes **Jan p22**
 Automan '85 preview **May p35**
 Automated Assembly feature **May issue**
 AA boosts output at Antiference **p17**
 Sciaky completes cell for 'leading car maker' **p19**
 Semi-conductor assembly automated 'step-by-step' **p21**
 When robots should be used **p23**
 Perkins learns a few lessons **p27**
 IPROE has 'wealth of experience' **p29**
 Robots assemble shower bases **p30**
 Bursting disc valves systems **p31**
 Automatic handling equipment 'doubles output' for Regent **Apr p15**
 Automatic measuring machine that may solve some of the problems in production **Jan p22**

B

Bar coding pays off for Case **Dec p15**
 Better education could help save manufacturing **Nov p48**
 Boosting tool life with cubic boron nitride **Jan p57**
 Bostik used in sports car production **Mar p45**
 Bridgeport adopts 'total quality' in machine production **Jan p35**
 Britain must make it—but does she need help? feature **July/August and September issues**
 'Three options are available to the UK' **Jul/Aug p29**
 Fighting back with a British lathe **Jul/Aug p29**
 Understanding just-in-time manufacturing **Jul/Aug p33**
 Licensing—for and against **Sept p22**
 Importers 'keep Britain abreast of new technology' **Sept p25**
 Japanese technology is overstated **Sept p28**
 What can we learn and how do we learn it? **Sept p31**
 Bursting disc valves systems **May p31**

C

Cadbury wraps up its production problems **Mar p22**
 CAE:
 Why a 'gut feeling' can be essential in justifying CAE **May p47**

CAPM feature June issue

What is CAPM and why do we need it? **p25**
 Support from management is essential **p30**
 A system 'likely to pay off' **p35**
 Human error 'eliminated' by CAPM system **p37**
 How a control system links a 'high-tech' company **p39**
 From woodchip to microchip **p47**
 Lucas goes for 'on-line' control **p51**
 CAPM '85 catalogue: **Apr p48**
 CAPM '85 preview: **Apr p45**
 Car makers improve ways of production **Oct p25**
 Cell runs up to four days unmanned **Dec p28**
 Ceramic tooling successful under 'punishing treatment' **Feb p50**
 CIM:
 Planning for CIM **Feb p21**
 Digital reveals its five-year plan for CIM **May p41**
 Understanding CIM and making it work **Dec p20**
 Colman's keeps its wine cask line flowing **Nov p28**
 Complex part made in one operation using 12 tools **Feb p45**
 Computers on the shopfloor **Feb p34**
 Computers that mimic human intelligence **Sept p15**
 Comtec 550 operators achieve 50% increase in production **Jul/Aug p43**
 Conveyors can cure your handling headaches **Nov p18**
 Covering the EDM market **Dec p31**
 Cubic boron nitride:
 Machining times cut by 90% with CBN **Feb p55**
 Boosting tool life with CBN **Jun p57**
 Cut corners—cut costs (6.EMO preview) **Sept p59**

D

Delta drills cut machining time and lower production costs **Feb p53**
 Digital goes for 'flexible solution' **Jan p10**
 Digital reveals its five-year plan for CIM **May p41**
 'Do it yourself' philosophy works **Jul/Aug p39**
 Does the machine tool industry face extinction? **June p19**

E

EDM feature **December issue**
 20% increase in turnover using EDM **p33**
 Cell runs up to four days unmanned **p28**
 Covering the EDM market **p31**
 Question the accepted methods **p36**
 'With EDM you get what you pay for' **p26**
 Electronic gauging aids cylinder head assembly **Jan p42**
 6.EMO preview **September issue**
 6.EMO—the perfect showcase for UK manufacturers **p37**
 The most important exhibition of all **p39**
 The best of British! **p43**
 Cut corners—cut costs **p59**
 Expansion programmes 'cost-effective' **Mar p15**

F

Fighting back with a British lathe **Jul/Aug p33**
 Flexibility the key at Fords **Nov p35**
 FMS:
 How to improve productivity—gradually **Jan p47**
 Lister installs £750 000 FMS **Jul/Aug p15**
 Agricultural machinery firm builds £1M FMS **Oct p11**
 'Futuristic' FMS at ICL's factory **Oct p15**
 Four hour gauging job now takes 15 minutes **Jan p40**
 From woodchip to microchip **Jun p47**

G

'Gamble' on CNC presses pays off for Westwood **Mar p12**

H

Heat treatment process 'improved' Feb p43
Hot melt adhesives used in manufacturing and packaging Mar p46
How a control system links a 'high-tech' company Jun p39
How new technology affects the production manager Jun p53
How to find your way around NE85 Apr p42
How to improve productivity—gradually Jan p47
How 10 robots improved productivity at Llanelli Apr p12
HSE, unions and employers are blamed for accidents at work Apr p21
Human error 'eliminated' by CAPM system Jun p37

I

Implementing quality control—both internally and externally Feb p26
Importers 'keep Britain abreast of new technology' Sept p25
Information on safety at work is 'insufficient' Apr p21
'Innovate or emigrate' Apr p25
Inspx preview Mar p32
Intelligent robots on the move! Feb p18
Investing in advanced manufacturing technology (ACARD) Oct p19
IProdE has 'wealth of experience' May p29
Is today already tomorrow? Nov p39

J

Japan:
Britain must make it (feature) Jul/Aug p29/Sept p22
JIT:
The way towards JIT manufacturing Jun p22
Understanding just-in-time manufacturing Jul/Aug p36
MRP II is the way to do JIT Oct p30

L

Laser capacity demands speedy programmer May p50
Leitz centre 'a showcase for quality' Jan p16
Licensing—for and against Sept p22
Lister installs £750 000 FMS Jul/Aug p15
Lucas goes for 'on-line' control Jun p51

M

Machine tool industry—does it face extinction? Jun p19
Machine tool installation: the basics of Jul/Aug p45
Machine vision: the development and future of Jul/Aug p26
Machines at half the price Jul/Aug p43
Machining times cut by 90% with CBN Feb p55
Make computers work for you! (CAPM '85 preview) Apr p45
Making fridge cabinets in an automated press line Feb p37
Managing quality—the implications for small companies Jan p39
Maxi-Check cuts inspection time Jan p21
'Men only' image of engineering will disappear Mar p23
MRP II is the way to do JIT Oct p30
Multi-point threading tools keep WIP to a bare minimum Feb p46

N

NE85 preview: Apr p31
Nitrotec: 'improved' heat treatment process Feb p43

O

Oil and gas production—progress needed Nov p44
On show at Automan '85 May p35

P

Perkins: £3½M automates assembly line and store Jan p13
Perkins learns a few lessons May p27
Planning for CIM Feb p21
Polar robot glues 'in seconds' Mar p45
Pump design allows for progressive automation Oct p49

Q

Quality assurance feature January issue
Leitz centre 'a showcase for quality' p16
Quality circles:—what they are and how to use them p17
Why quality circles fail p18
Maxi-Check cuts inspection time p21
The automatic measuring machine that may solve some of the problems in production p22

Auto-changer for probes p22
Bridgeport adopts 'total quality' in machine production p35
Managing quality—the implications for small companies p39
Four hour gauging job now takes 15 minutes p40
Electronic gauging aids cylinder head assembly p42
Quality 'is manufactured, not measured' p43
Quality at the IProdE p43

Quality circles

Alive but not well Oct p22
The queue is for quality Dec p12
What they are and how to use them Jan p17
Why quality circles fail Jan p18

Quality 'is manufactured, not measured' Jan p43

Question the accepted methods (EDM feature) Dec p36

Quality control from new range of potting and bonding machines Mar p49

R

Retrofit & rebuild feature July/August issue

'Do it yourself' philosophy works p39
Anilam CNC makes form grinding 'less arduous and more accurate' p41
Camtec 550 operators achieve 50% increase in production p43
Machines at half the price p43

Robots:

How 10 robots improved productivity at Llanelli Apr p22
Intelligent robots on the move! Feb p18
Three robot users admit their mistakes Jul/Aug p23
When robots should be used May p23
Why robots can be unprofitable Mar p25

Robots assemble shower bases May p30

Robots at work with medicines and adhesives Sept p19

S

Safety—information on safety at work is 'insufficient' Apr p21
Sciaky completes cell for 'leading car maker' May p19
Semi-conductor assembly automated 'step-by-step' May p21
Sheetmetal working feature October issue

An end to powercuts? p41

A 'new approach to punching' p32

Smoothing things out at a biscuit factory Nov p32

Support from management is essential Jun p30

T

Teaching engineers about adhesives Mar p37
Terminals give APT 'foolproof' data collection Feb p33
The basics of machine tool installation Jul/Aug p45
The best of British! (6.EMO preview) Sept p43
The development and future of machine vision Jul/Aug p26
The most important exhibition of all (6.EMO preview) Sept p39
The way towards JIT manufacturing Jun p22
'Three options are available to the UK' Jul/Aug p29
Three robot users admit their mistakes Jul/Aug p23
Tooling and cutting tools feature February issue
Complex part made in one operation using 12 tools p45
Multi-point threading tools keep WIP to a bare minimum p46
'World first' in computerised tool management p47
Ceramic tooling successful under 'punishing treatment' p50
Annealing eliminated by special tooling p51
Delta drills cut machining time and lower production costs p53
Tooling requirements for unmanned machining p54
Machining times cut by 90% with CBN p55
Tool company moves into prop shaft manufacturing Apr p19
Tooling requirements for unmanned machining Feb p54
Turning bar into blades in eight minutes Nov p24

U

UK boasts large market growth May p13
Understanding just-in-time manufacturing Jul/Aug p36

W

What can we learn and how do we learn it? (from the Japanese) Sept p31
What is CAPM and why do we need it? Jun p25
When robots should be used May p23
Where to find them (British exhibitors at 6.EMO) Sept p57
Why a 'gut feeling' can be essential in justifying CAE May p47
Why quality circles fail Jan p18
Why robots can be unprofitable Mar p25
Why simple is best in manufacturing Jul/Aug p18
'With EDM you get what you pay for' Dec p26
'World first' in computerised tool management Feb p47
